DETAILED ACTION

1. Claims 1-10 and 12-40 are allowed.
2. The following is an examiner's statement of reasons for allowance: for claims 1–10, 12-14, and 40, the primary reason for allowance of these claims is the inclusion, among other things, of a step of digitally processing successive the first and second sets of digital signal waveform samples, which is based on a block regression technique, to generate continually updated digital characteristic parameters representing a characteristic behavior of the first signal. For claims 15-31, the prior fails to teach the inclusion of the digital phase accumulator in a phase digitizing system in which the accumulator is configured to generate a plurality of digital phase progression values based on current frequency values and current phase correction values. And for claims 32-39, the prior art also fails to teach the inclusion of at least one digital signal processor, which is coupled to the plurality of ADCs (and among other features), for digitally processing each first and second set of the digital measurement signal waveform samples and the digital reference signal waveform samples. For these reasons, the pending claims are allowed.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
